During the Hortifair and IFTF, Terra Nigra received positive feedback from visitors. Both the new gerbera and rose varieties were liked by customers, agents and suppliers, all calling the new assortment and quality of the products very promising.

It was nice to see so many of our agents again during the show week. We hope you enjoyed the agent night that gave all of us an opportunity to socialize with other agents and Terra Nigra staff while having an informal dinner. Thank you for attending!

We changed our gerbera growing system in the showroom. We now cultivate the plants in a Worm system in coco, 7 plants per m2 with an artificial light level of 5500 lux. The plants are very uniform and growing well.

Some eye catchers that received a lot of attention during the show were...

Terra Snooki: a catchy yellow standard gerbera with black center and very high production

Terra Tambourin: a soothing light and dark pinkish bicolor with dark center & long stems

Germini® Terra Sambuca: ▲ a delicious looking pink and white bicolor with green center and great vase life

Germini® Terra Delaja: a catchy yellow with green center Germini

Germini® Cruise: a vibrant orange yellow Germini with green center

Lipari: ▲ a soft colored yellow and orange bicolor with great production

Terra Kalina: ▲ a true dark red with dark center, long stems and good production

Terra Adisa: a medium pink, high quality standard variety
Germini® Terra Maskerade: a very productive pinkish Germini with lighter petal edges
